PROWLER® 930

ROBOTIC INGROUND POOL CLEANER

MOBILE APP GUIDE

IMPORTANT SAFETY INSTRUCTIONS
READ AND FOLLOW ALL INSTRUCTIONS
SAVE THESE INSTRUCTIONS

Your Prowler® 930 Robotic Inground Pool Cleaner contains a *Bluetooth*® Wireless Technology receiver that allows the cleaner to communicate with most smartphones.

The following guide provides instructions on how to pair the cleaner with a compatible smartphone, as well as how to use the Manual Drive function.

For further instructions regarding the operation and maintenance of the Prowler 930, refer to the Installation and User's Guide provided with the cleaner. A link to this guide can be found on the Links and Info screen within this app.

Downloading the Prowler 930 Mobile App

The Prowler 930 Mobile App can be found in most smartphone app stores by searching the keywords, "Prowler 930" or "Kreepy Krauly".

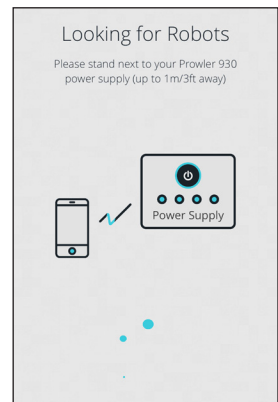

Pairing Your Smartphone to the Cleaner

To successfully pair your smartphone to a Prowler 930 cleaner, the smartphone must be broadcasting a *Bluetooth* connection signal. Ensure *Bluetooth* capability is enabled before attempting to pair with the cleaner.

1. The first time the Prowler 930 Mobile App is opened on a mobile device, the app will begin to search for a Prowler 930 cleaner to pair with.

The smartphone must be within 3 feet (1 m.) of the cleaner's power supply to successfully pair with the cleaner.

2. Once a cleaner(s) is recognized by your smartphone the Select Robot screen will display.

Cleaners will display by serial number. Select the cleaner you wish to connect to.

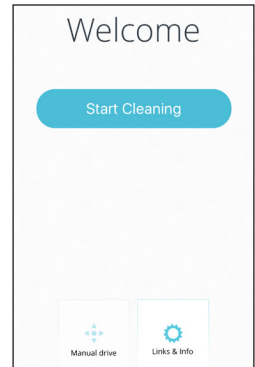

Pairing Your Smartphone to the Cleaner (cont.)

3. After successfully connecting your smartphone to the desired Prowler® 930 Robotic Inground Pool Cleaner, the Welcome screen will display.

You'll have three options on this screen:

- **Start Cleaning:** This button will activate the cleaner and begin the automatic cleaning cycle that is set at the power supply.
- **Manual Drive:** This button will send you to the Manual Drive screen. For more detailed information on the Manual Drive function, continue to *Operating the Cleaner with Manual Drive*.
- **Links and Info:** This button will direct to a list of helpful links related to your Prowler 930 cleaner. A link to the Prowler 930 Installation and User's Guide can be found here.

Operating the Cleaner with Manual Drive

First, tap the Start Cleaning button on the Welcome screen. The Manual Drive button will not be accessible until a cleaning cycle is in process.

After selecting the Manual Drive function on the Welcome screen, the Manual Drive screen will display.

Manual Drive allows you to manually drive your Prowler 930 cleaner around the pool. This allows for easy and quick spot cleaning of the pool floor.

There are two options for manually controlling your cleaner:

1. **Joystick Mode:** This is the default Manual Drive mode. The cleaner direction and speed is controlled by your thumb as you guide the "joystick".
2. **Tilt Mode:** Enter Tilt Mode by swiping the Tilt Mode toggle at the bottom of the Manual Drive screen to ON. The cleaner direction and speed will now be controlled by the direction and angle you tilt your smartphone.
