

PENTAIR® SHURFLO® PRODUCT INTRODUCTION

40X9 SERIES – RV/CARAVAN FRESH WATER PUMPS

Pentair SHURFLO is proud to introduce a new range of 40X9 series Fresh Water Pumps!

Multi-fixture Fresh Water Pump

SHURFLO's 40X9 freshwater pump design was created with a unique one-piece diaphragm and internal bypass (on applicable models), supporting pump life and performance in all plumbing systems.

Designed as the next legendary pump to exceed the expectations of our customers, the 40X9 series pump is constructed for high flow demand, dampened vibration noise, and elimination of rapid cycling.

Additionally, all SHURFLO 40x9 series models support key regulations in the European Caravan/RV marketing, including Electromagnetic Compatibility with the E8 mark and German drinking water by using all KTW-BWGL compliant wetted materials.

Features

- Compact 4 chambers design
- KTW-tested and approved
- E-Mark certification
- Metal or elastomer base plate available

Benefits

- Fits readily in the same installation space as our 2095-series pumps
- Smooth operation
- Dampened noise

Product Cross-Reference Guide

The Shurflo 40x9 series of pumps is intended to upgrade and replace the pre-existing 2095 series. Following the rollout of the 40x9 series pumps, the 2095 series will be discontinued at a future date. Pentair will provide notification, timing, and an opportunity for last time purchases of the 2095 series in a future announcement.

See the product data table below for cross-referencing 2095 models to the corresponding 40X9 replacement.

Current Product		New Product	
Part Number	Description	Part Number	Description
